## What is Mobilist

Mobilist is a website that securely manages and sends custom forms from an organization's secure dashboard to their member's mobile devices. It receives and stores data from member mobile devices. The account administrator controls what forms are provided to members and what reports are generated from returned data. Once set up, the Mobilist website account operates with minimal oversight. It verifies that checklists are performed, sends alerts to others of actions required, and provides easy access to procedures to members. This system requires no new hardware, the account dashboard is cloud based, and the mobile app is free.

The first page of the Welcome to Mobilist form is as follows. When you are finished with any page, click the **Next** button.

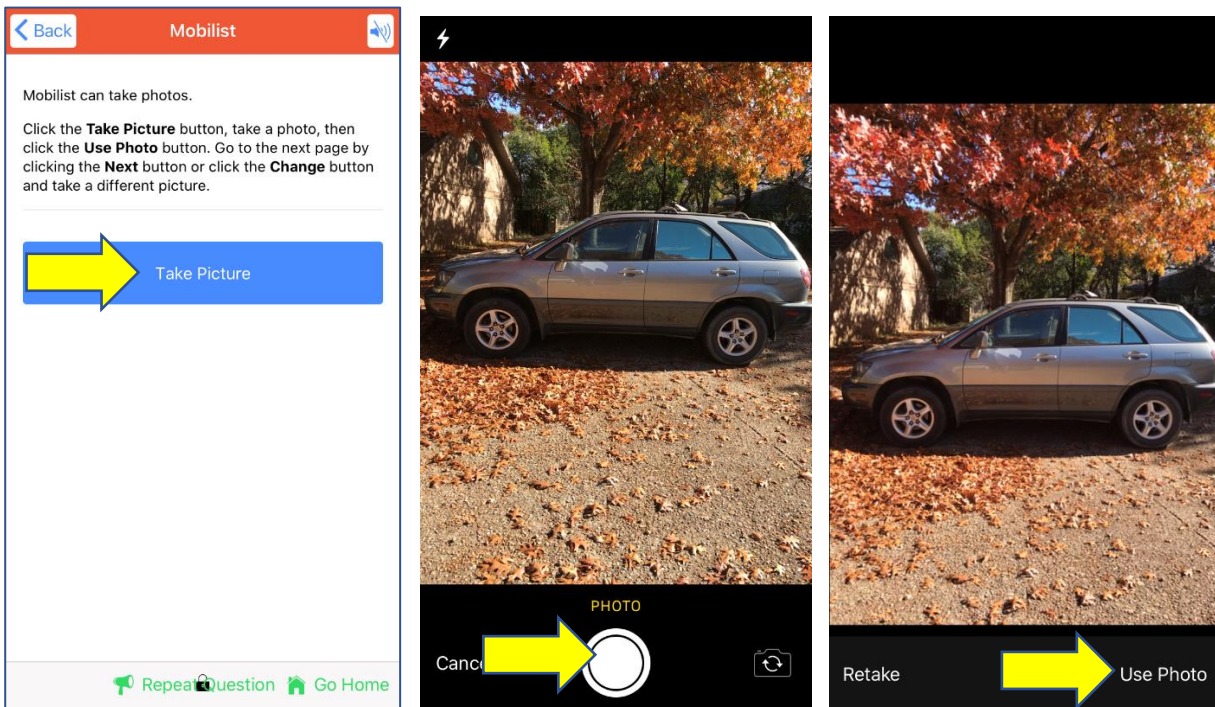

A typical comment page looks like the following. Check the **Comment** button, speak into the phone, then press the Done button. Your speech will convert to text and show on the screen. If you want to change what you recorded, click the **Change** button and rerecord your answer.

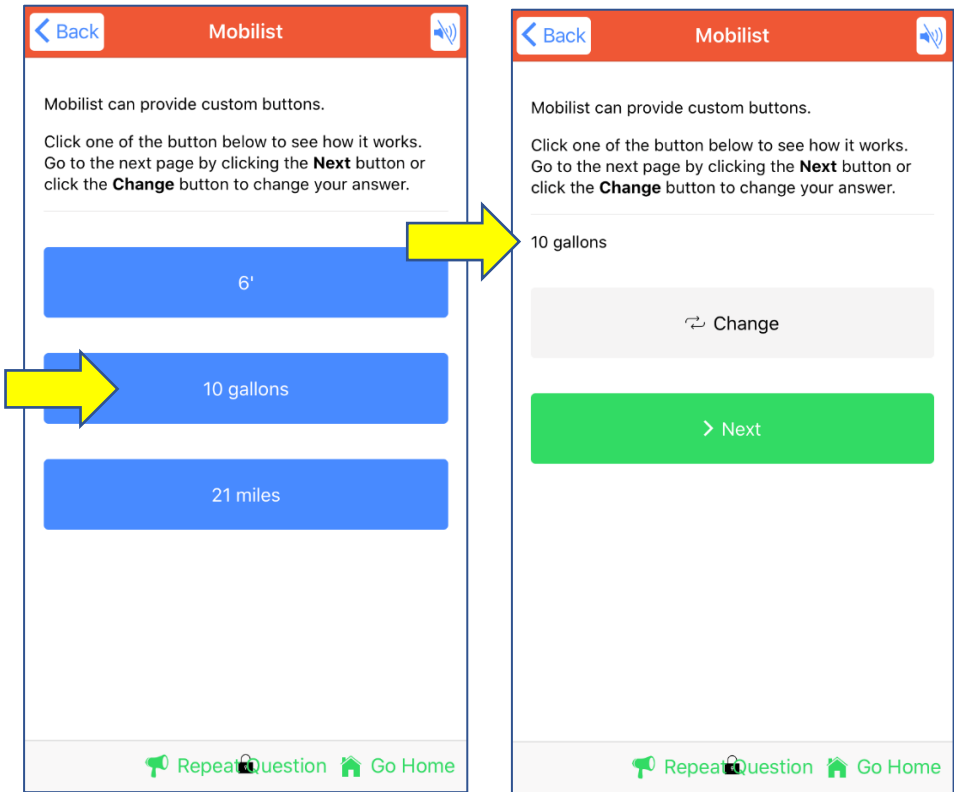

A typical photo page looks like the following. Click the Take Picture button. Take a picture. Click the **Use Photo** button or **Retake** button.

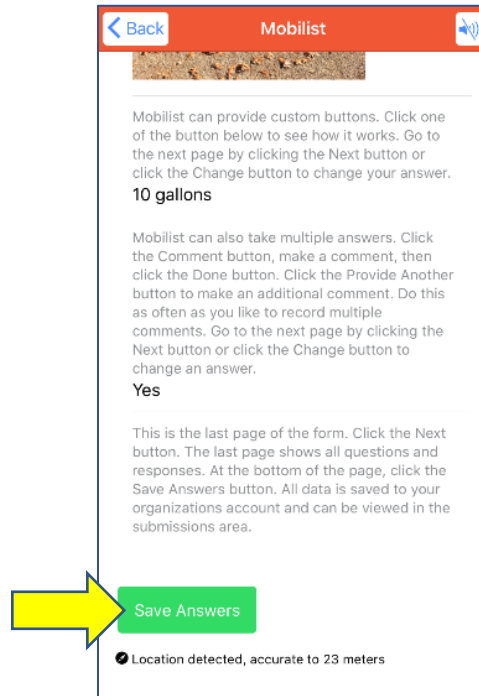

The next page allows you again to change the photo or continue to the next page by clicking the **Next** button.

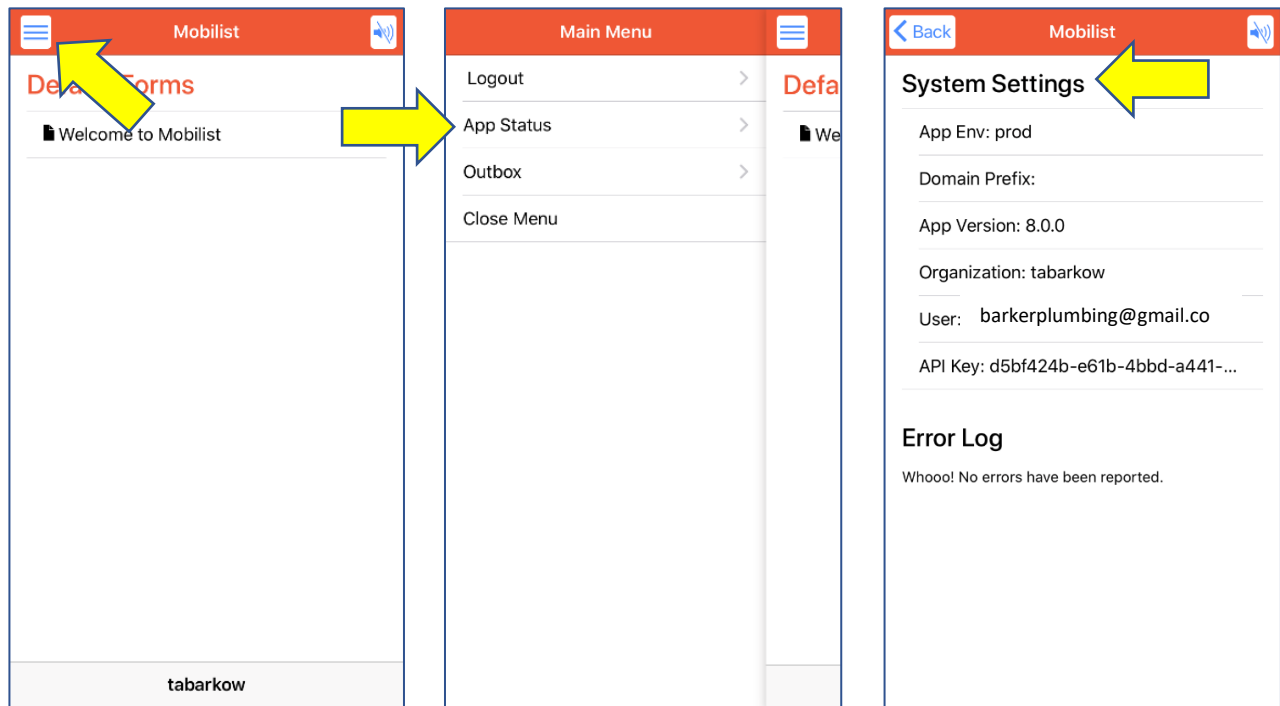

The following is a typical Quick Answer button page where you are given a choice of buttons which provide a specific answer. Click the **Next** button when satisfied with the answer.

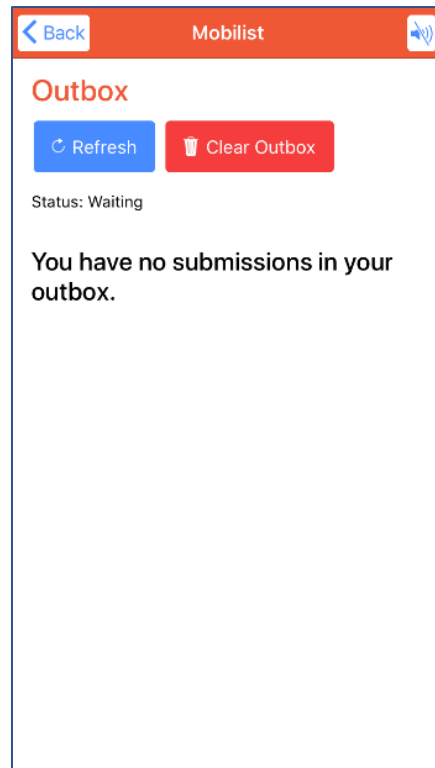

When all the pages of the form are complete, at the bottom of the last page, click the Save Answer button and all your answer will be saved to your web account.

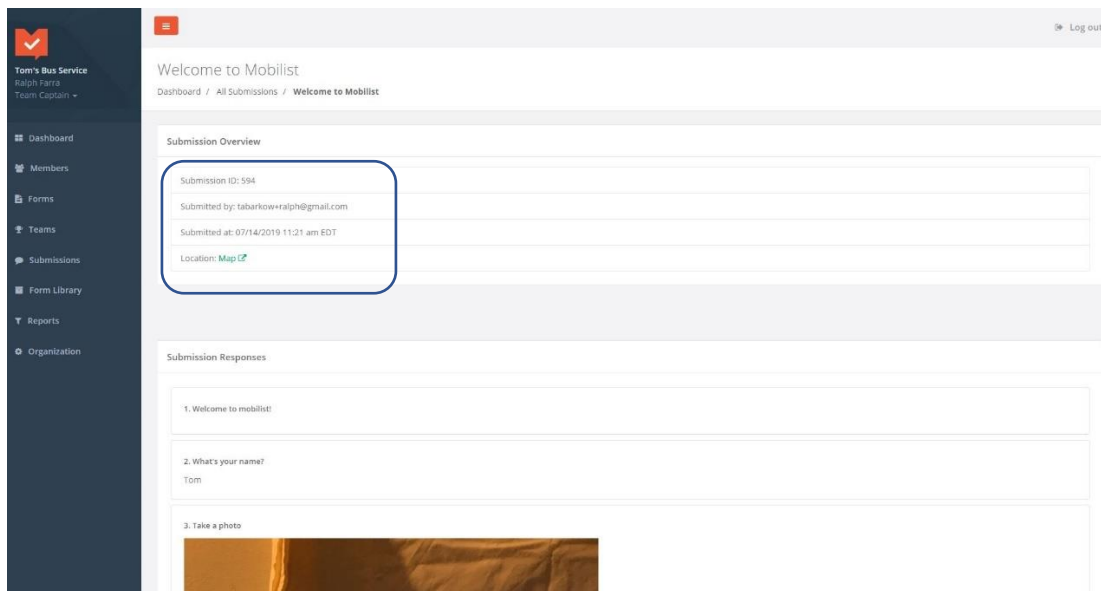

To view the settings, click the setting icon in the upper left. Under App Status you can see the System Settings. You can also log out of the app although it is not recommended. If you do log out, log back in the same way as before.

Clicking the Outbox shows the status of any upload.

Your responses will be sent to your web account, where you can view them in the Submissions section. Notice that each submission includes who, when, and where it was made.

# Forms

From your dashboard, click the **Forms** button. The **Forms** page will load. First time users will only see a single Default Forms folder with a border around, signifying that any forms on the right are in that folder, and a single form in that folder called **Welcome to Mobilist**.

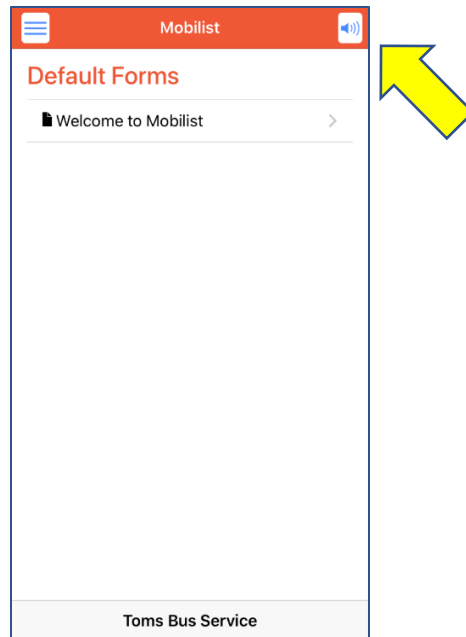

Clicking the Welcome to Mobilist title will open the form to its individual pages. Each page has a Form Builder text editor, check boxes, and a box to list Quick Answer Buttons. At the top left are arrows which allow you to reorder the individual pages. The first page of this form is text only, so none of the check boxes on the right are selected and there are no quick answer buttons listed.

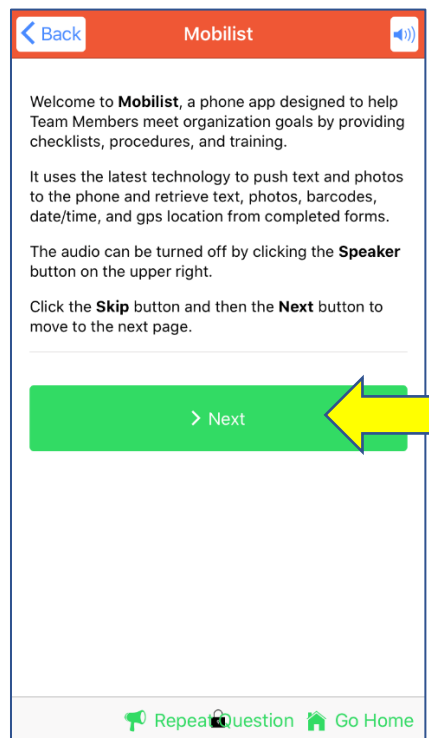

The screenshot shows the 'Welcome to Mobilist' form editor. At the top, there's a breadcrumb trail: 'Dashboard / All Forms / Welcome to Mobilist'. Below this is the 'Form Details' section with fields for 'Name\*' (Welcome to Mobilist), 'Folder\*' (Default Forms), 'Save form results in Mobilist?\*' (Yes), and 'Send form results to' (Optional e-mail address). The 'Questions' section is highlighted with a yellow arrow. It contains a 'Question Text\*' field with a rich text editor. The text in the editor reads: 'Welcome to \*\*Mobilist\*\*, a phone app designed to help Team Members meet organization goals by providing checklists, procedures, and training. It uses the latest technology to push text and photos to the phone and retrieve text, photos, barcodes, date/time, and gps location from completed forms.' To the right of the text editor are four checkboxes: 'Comment Button', 'Photo Button', 'Barcode Button', and 'Multiple Answers', all of which are currently unchecked. Further right is a 'Quick Answers Button' field, which is empty. Below this field is a note: 'Separate buttons with commas. Ex: Yes, No, Maybe.'

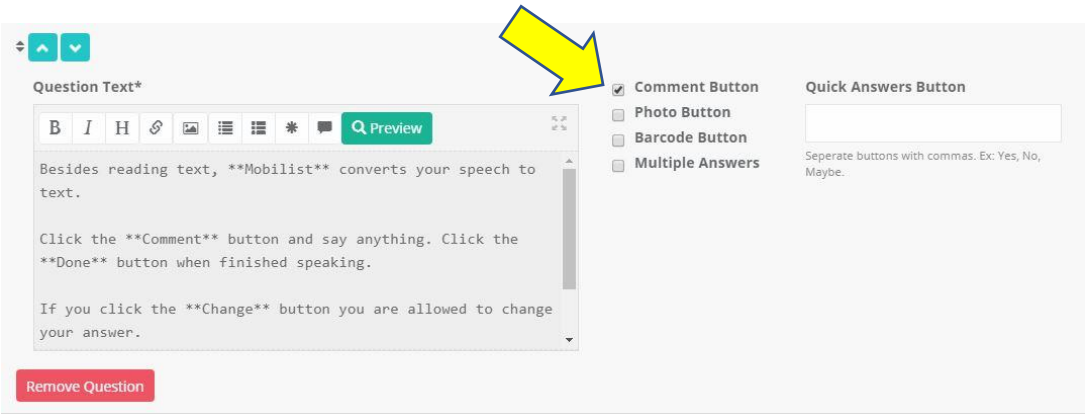

Now look at the Welcome to Mobilist form as it is displayed on the mobile phone app. Opening the phone app show the menu page, the Default Forms folder, and the Welcome to Mobilist form title. Clicking the Welcome to Mobilist title opens the form. Notice that the text to voice feature can be muted by clicking the speaker icon at the upper right.

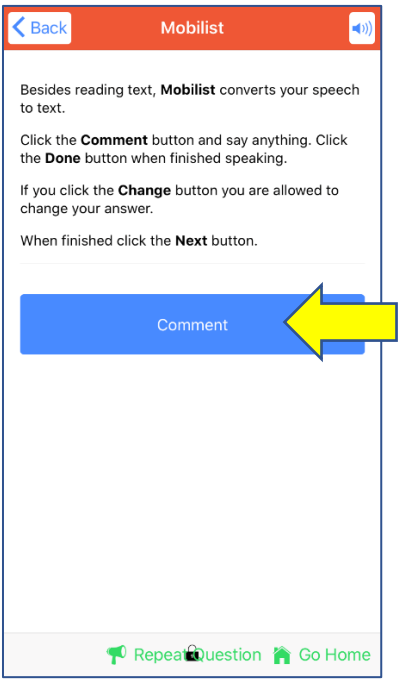

The first page of the form speaks the welcome message. Clicking the Next button takes the form to the next page.

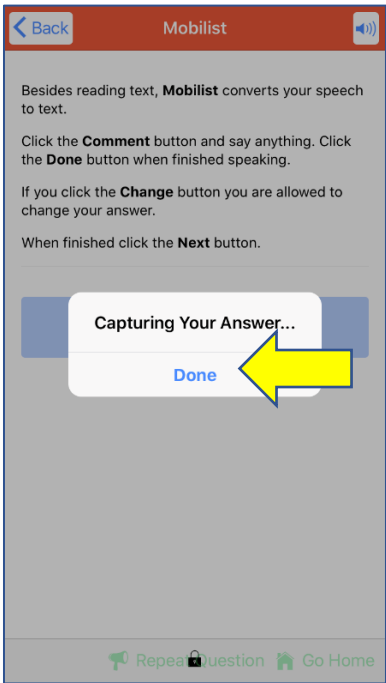

Back on the website Form Builder, the next page shows a single comment page. The text is provided to guide the user. Notice that the Comment Button check box is selected.

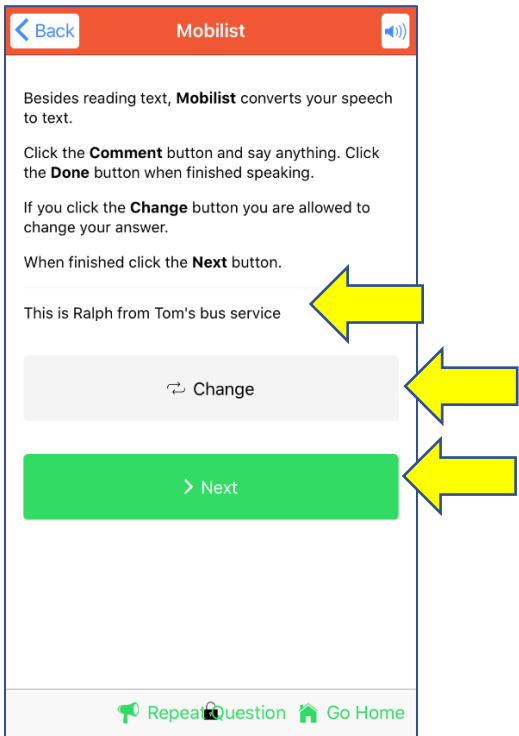

The phone app page for single comment looks like this. Clicking the Comment button starts the recorder on the phone.

Speak into the phone and your voice is converted to text. A dialog window allows you to tell the app you are done recording. When finished, press the **Done** button. (0787)

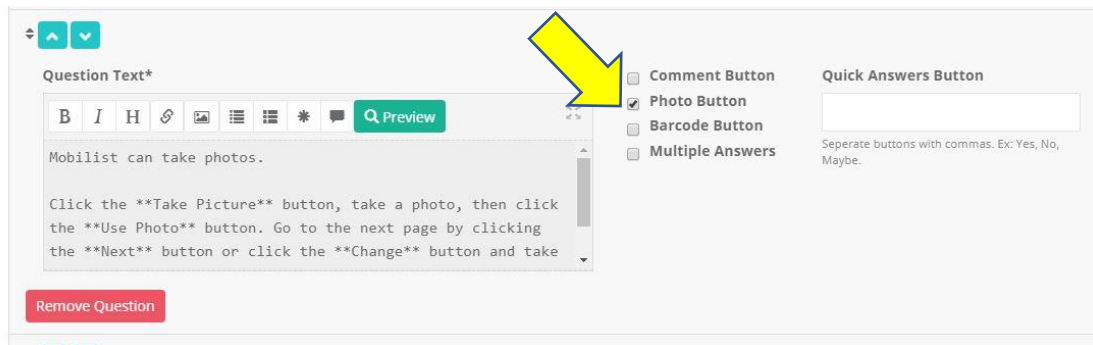

Your recorded voice is converted to text. You can rerecord or go to the next page. 0784

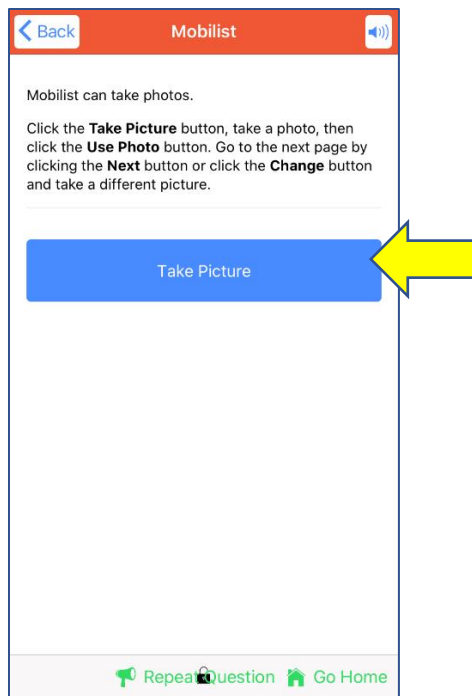

Going back to the website form builder, the next page allows for taking photos. Notice that the **Photo Button** check box is checked, and the text explains how the user is to proceed with this page.

The screenshot shows a form builder interface. On the left, there's a 'Question Text\*' field with a rich text editor containing the text: 'Mobilist can take photos. Click the \*\*Take Picture\*\* button, take a photo, then click the \*\*Use Photo\*\* button. Go to the next page by clicking the \*\*Next\*\* button or click the \*\*Change\*\* button and take'. Below this is a 'Remove Question' button. On the right, there's a list of buttons to add: 'Comment Button', 'Photo Button' (checked), 'Barcode Button', and 'Multiple Answers'. A yellow arrow points to the 'Photo Button' checkbox. To the right of this list is a 'Quick Answers Button' field with a text input and a note: 'Separate buttons with commas. Ex: Yes, No, Maybe.'

The phone app shows the following for this page. Clicking the **Take Picture** button brings up the camera function of the phone.

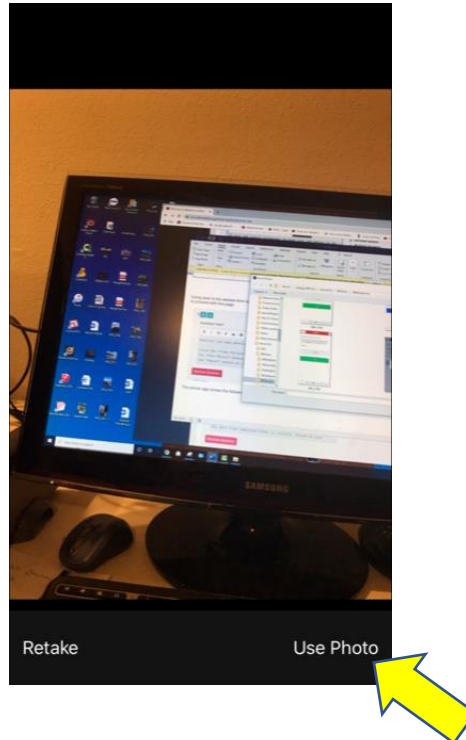

The screenshot shows a mobile app interface. At the top is a red header bar with a '< Back' button, the title 'Mobilist', and a speaker icon. Below the header, the text reads: 'Mobilist can take photos. Click the **Take Picture** button, take a photo, then click the **Use Photo** button. Go to the next page by clicking the **Next** button or click the **Change** button and take a different picture.' Below this text is a large blue button labeled 'Take Picture'. A yellow arrow points to this button. At the bottom of the screen is a navigation bar with three icons and labels: a speech bubble icon for 'Repeat Question', a house icon for 'Go Home', and a question mark icon.

Click the **Photo** button on the phone.

Click the Use Phone button if you are satisfied with the photo.

Your photo will then show on the form page where you can use the **Change** button to take another picture or go to the **Next** page of the form.

On the right is a list of button types: 'Comment Button', 'Photo Button', 'Barcode Button', and 'Multiple Answers', each with an unchecked checkbox. A yellow arrow points from the 'Photo Button' checkbox to the 'Quick Answers Button' section. This section has a text input field containing '6', 10 gallons, 21 miles' and a small note below it: 'Seperate buttons with commas. Ex: Yes, No, Maybe.'

The phone app will show the following for a quick answer form page.

A screenshot of a mobile application interface titled "Mobilist". At the top, there is a red header bar with a blue back arrow and the word "Back" on the left, and a speaker icon on the right. Below the header, the text reads: "Mobilist can provide custom buttons. Click one of the button below to see how it works. Go to the next page by clicking the **Next** button or click the **Change** button to change your answer." Below this text are three blue rectangular buttons stacked vertically, labeled "6'", "10 gallons", and "21 miles". A large yellow arrow points from the right towards the "10 gallons" button. At the bottom of the screen is a light gray bar with two green icons and text: a megaphone icon followed by "Repeat Question" and a house icon followed by "Go Home".

Clicking the **10 gallons** button results in the 10 gallon response shown on this page. You can change the answer or go to the next page of the form.

A screenshot of the same mobile application interface, but now showing the result of clicking the "10 gallons" button. The text "10 gallons" is displayed above two buttons: a light gray button labeled "Change" with a circular arrow icon, and a green button labeled "Next" with a right-pointing arrow icon. A large yellow arrow points from the left towards the "10 gallons" text. The header and footer remain the same as in the previous screenshot.

The next page on the Form Builder shows how to create a multiple answers form. By clicking any check box along with the Multiple Answer check box, you create a form page that will take multiple answers until you decide to go to the next form page on the phone app.

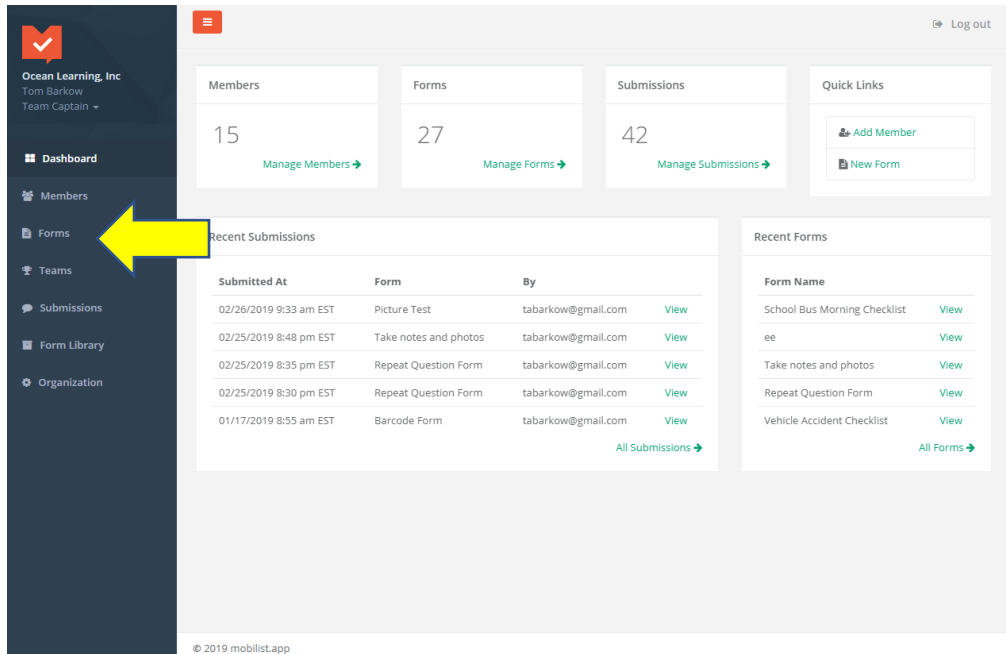

The screenshot shows the Form Builder interface. On the left, there's a 'Question Text\*' field with a rich text editor containing the text: 'Mobilist can also take multiple answers. Click the \*\*Comment\*\* button, make a comment, then click the \*\*Done\*\* button. Click the \*\*Provide Another\*\* button to make an additional comment. Do this as often as you like to record multiple comments.' Below this is a 'Remove Question' button. On the right, there's a list of options: 'Comment Button' (checked), 'Photo Button' (unchecked), 'Barcode Button' (unchecked), and 'Multiple Answers' (checked). To the right of this list is a 'Quick Answers Button' section with a text input field and a note: 'Separate buttons with commas. Ex: Yes, No, Maybe.' Two yellow arrows point from the 'Multiple Answers' checkbox to the 'Quick Answers Button' section.

## Form Library

If you want to copy a form from the form library, start by clicking the form Library button on the dashboard. This will bring up a list of folders. Click on the folder of your choice.

Clicking the folder brings up the forms in that folder. Notice that at the right are buttons to preview the form or Use it.

Clicking the **Preview** button brings up the form in preview mode.

The screenshot shows the 'Preview: Conventional Forklift Daily Checklist' form. The left sidebar contains the user profile 'Polybuilt Custom Homes' and a navigation menu with items like Dashboard, Members, Forms, Teams, Submissions, Form Library, Reports, Organization, and Subscription. The main content area has a breadcrumb trail: 'Dashboard / Form Library / Forklift Checklists / Preview: Conventional Forklift Daily Checklist'. The form itself is titled 'Questions' and contains three sections of questions. The first section asks for the vehicle number or type. The second section asks if walk-around checks are normal, listing seven items: hydraulic leaks, frayed lines, bent forks, missing stops, damaged tires, missing lug nuts, and lift chains. The third section asks if engine compartment items are normal, listing four items: coolant level, oil level, fan and alternator belts, and battery terminals. At the bottom of each section, there is a prompt to click 'Yes' or 'Comment'.

If this appears to be what you need, go back to the previous page and click the **Use** button.

The screenshot shows the 'Forklift Checklists' page. The left sidebar is identical to the previous screenshot. The main content area has a breadcrumb trail: 'Dashboard / Form Library / Forklift Checklists'. It displays a list of ten forklift checklists. Each row has a 'Preview' button and a 'Use' button. A large yellow arrow points to the 'Use' button for the 'Conventional Forklift Daily Checklist'.

The Modify Report page includes Report Details, Report Columns, and Report Filters.

An optional email alert on this page allows this report to be sent to a responder whenever the report is generated. This is called an Alert Report.

The name you choose for the report should identify the purpose of the report.

In the Report Columns area, click the checkbox for all questions you want in your report. When checked, a Report Heading Text box appears below the box to allow you to type the name of the column. This name will appear as a column header on your report. In this example, the Submission timestamp column is named Time, the individual who submitted the response is called Name, and the vehicle number or type is named Vehicle Number.

Once all the Report Columns have been specified and named, the Report Filters allow for filtering the data in your selected columns.

If filtering is needed for any of the Report Columns, it will be done in the Report Filters area. Note that the first line shows the form question State the Vehicle number. Since the checkbox is not checked, no filtering will be done on this line and any vehicle number can show in the report. The next line shows the form question which asks if the walk around checks are normal. Since this form question uses a Quick Answer Button for the None response to everything being normal, the filter needs to remove all responses with None as an answer.

Here is the phone app question. Notice that clicking the **None** button means everything on this page is normal. If there is something not normal, a comment identifies the problem.

Start with the walk around checks.  
Are there problems?

1. No hydraulic leaks
2. No frayed hydraulic lines
3. No bent forks
4. No missing fork stops
5. No damaged tires
6. No missing lug nuts
7. No problems with the lift chains

If there no problems, click **None**, if there are prolems, **Comment**.

Repeat Question Go Home

What is left will be comments which indicate a problem. With that in mind, the Does not contain the text criteria is used, and the text which will not be used is the word None. Note that the Quick Answer Button for the None response was used when the form was created to ensure that all None answers are not misspelled by the voice to text feature. From the Answer line, a pull down is four possible filters is supplied. These are: Contains the text, Does not contain the text, Is exactly, and Is not exactly. In this case, choose the filter, Does not contain the text. Then fill in the line for the text it does not contain, which is None. In this way, only comments provided during the checklist will be included in this report.

## **Best Practices**

As Administrator, install the Mobilist Team Member App and connect it to the web account dashboard with an access code. You will now have access to all forms for all Teams. After creating a form, test it on your mobile device to ensure it works properly.

When making machinery checklists, it is not always necessary to have a single checklist item on each page. If several checks can be made in an area, put these items on a single checklist page.

Once forms and checklists are familiar to employees, instructions like Click the Next button should be unnecessary.

If you want a checklist done each shift, daily, or monthly, put that in the title of the form.

It is good practice to have a single form called Suggestions to the Administrator available to all members. In this way, employees using Mobilist forms can easily communicate ways to improve their experience.

Employees do not have access to the Administrator's dashboard and any data added during a form's completion is deleted from the employee's mobile device after the form has been submitted.

It is good practice to provide employees who might interact with customers with training about how to handle customer complaints.

It is good practice to provide employees procedures on how you expect them to handle accidents and how to document it using a Mobilist form.

Placing forms in the folders makes the mobile app screen presentation more compact. Folders can be arranged from the dashboard under the forms area. Folders at the top will show at the top on the mobile app. It is good practice to place the most used or most important folders near the top so they will appear that way on the mobile app.
